	or biological infaction	9.		

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with

Una Lauricia on 6/27/07.

The application has been amended as follows:

In the claims:

In claim 15, line 1, delete "14" and add -- 1 -- after "claim".

In claim 28, line 1, delete "27" and add -- 18 -- after "claim".

The following is an examiner's statement of reasons for allowance: The present invention is directed to a datalogging hearing aid and a method to log data in a hearing aid. Independent claim 1 identifies the uniquely distinct feature of a method of logging data in a hearing aid wherein a date or time unit in the hearing aid is synchronized with an external synchronization unit and an acoustic signal or speed synthesized information is generated in the hearing aid based on the previously set time or date information in combination with all the disclosed limitations of claim 1. Independent claim 18 identifies the uniquely distinct feature of a hearing aid for logging data at a programmable point in time wherein a date or time unit in the hearing aid is synchronized with an external synchronization unit and an acoustic signal or speed synthesized information is generated in the hearing aid based on the previously set time or date information

Application/Control Number: 10/765,250 Page 3

Art Unit: 2615

in combination with all the disclosed limitations of claim 18. The closest prior art, Troelsen et al. (US 2002/0071582) discloses a method for recording information in a hearing aid at a specific point in time to prevent data corruption but fails to teach synchronizing the data with an external synchronization unit or the data generated based on previously set time or date information; Mangold et al. (US 4972487) teaches a datalogging hearing aid for monitoring changes made to a hearing aid for easier tuning of the hearing aid to a specific user; Leenen et al. (US 2004/0066944) teaches a method for logging data in a hearing aid for monitoring operation and performance of the hearing aid; and Binder et al. (US 2003/0138109) teaches a hearing aid with an embedded Internet interface for error communication to an acoustician via the Internet. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sinh Tran can be reached on 571-272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks P.O. Box 1450

Application/Control Number: 10/765,250 Page 4
